

**We need your help to get West Papuan voices heard at the COP26**

Tomorrow afternoon, with the COP26 in Glasgow as its backdrop, the [ULMWP & Provisional Government](#) will announce their world leading 'Green State Vision', for an independent West Papua.

The Vision, developed by West Papuan leaders through grass-roots consultation, and in collaboration with international lawyers, contains world-leading proposals for addressing the climate crisis head on. Based on traditional Melanesian beliefs around reciprocity between all beings, a free West Papua pledges to firmly place the rights of people and planet before profit, paving the way for a sustainable relationship with the natural world.

As world leaders meet to discuss the global climate crisis, the indigenous people of West Papua are showing the world that they have practical solutions to help counter climate change and their vision offers wisdom and hope for the future of the entire planet.

A live stream of the launch event can be found [here](#)

**Please join us in helping to amplify the voices of the West Papuan people**

**For those in Glasgow for the COP:**

Join the [March Against Climate Colonialism](#) on 7th November. Organised by [Global Justice Now](#) and the [Free West Papua Campaign](#), this march will call out the big polluters complicit in human rights and environmental abuses in West Papua and elsewhere.

**Show support and spread the word on social media:**

By using the hashtags **#GreenStateVision** **#FreeWestPapua** and **#COP26**

*Here is an example message which can be adapted for Twitter, Instagram & Facebook etc.*

*I'm supporting **#WestPapua**'s historic **#GreenStateVision** for climate justice! In this global climate emergency, it is essential that the world listens to, and supports the solutions coming from indigenous people on the frontlines of climate change.*  
**#FreeWestPapua #COP26**
